

Rx-Universe[®]

Optical Lab Software and Solutions

Forward-Thinking LMS

Industry-Wide Expertise

Unparalleled Support

Enhance efficiency. Elevate quality.

Rx-Universe comes alongside optical labs as true long-term partners, providing forward-thinking LMS technology and expert support you can count on. With innovative tools and deep, industry-wide expertise at your fingertips, you'll be free to move forward unhindered in your relentless pursuit of excellence.

“Optical Lab Software Solutions has been one of our best vendor partners through the years. They have been a strong partner in supporting our strategic initiatives, providing insight and guidance. The support staff has been phenomenal in their flexibility and willingness to create solutions stemming from requests derived from our lab Continuous Improvement teams and leadership. The OLSS support team has always been resolution oriented and ready to partner with our information systems/ tech teams to navigate changes and requirements in maintaining the lab management system to specifications.”

— WALMART INC.

5 Reasons Optical Labs Choose Rx-Universe

Comprehensive Production Control

Precise and comprehensive control over each job from beginning to end, allowing you to continually adjust the process to increase efficiency and quality.

Integrated Business Intelligence

Real-time access to powerful insights and robust analytics about your lab's business so you can make quick informed decisions, adjust where needed and increase your quality of service.

Flexible and Scalable Architecture

Modular architecture offers multiple options based on your unique needs, plus the ability to add functionality later, so you can start managing your lab where you are today and seamlessly scale for future growth.

Superior Industry Expertise and Support

As a member of the EssilorLuxottica family (and a vast network of industry relationships), a global team of partners are ready to help you solve any issue with industry-wide expertise and excellence, from concierge-level installation to on-demand support anytime.

Modern User Experience

Experience technical software functionality expertise without sacrificing usability, including modern browser user interfaces accessible on any device or operating system, as well as multilingual capabilities system-wide.
